Psychotronic Mind Control

(demonstrations)

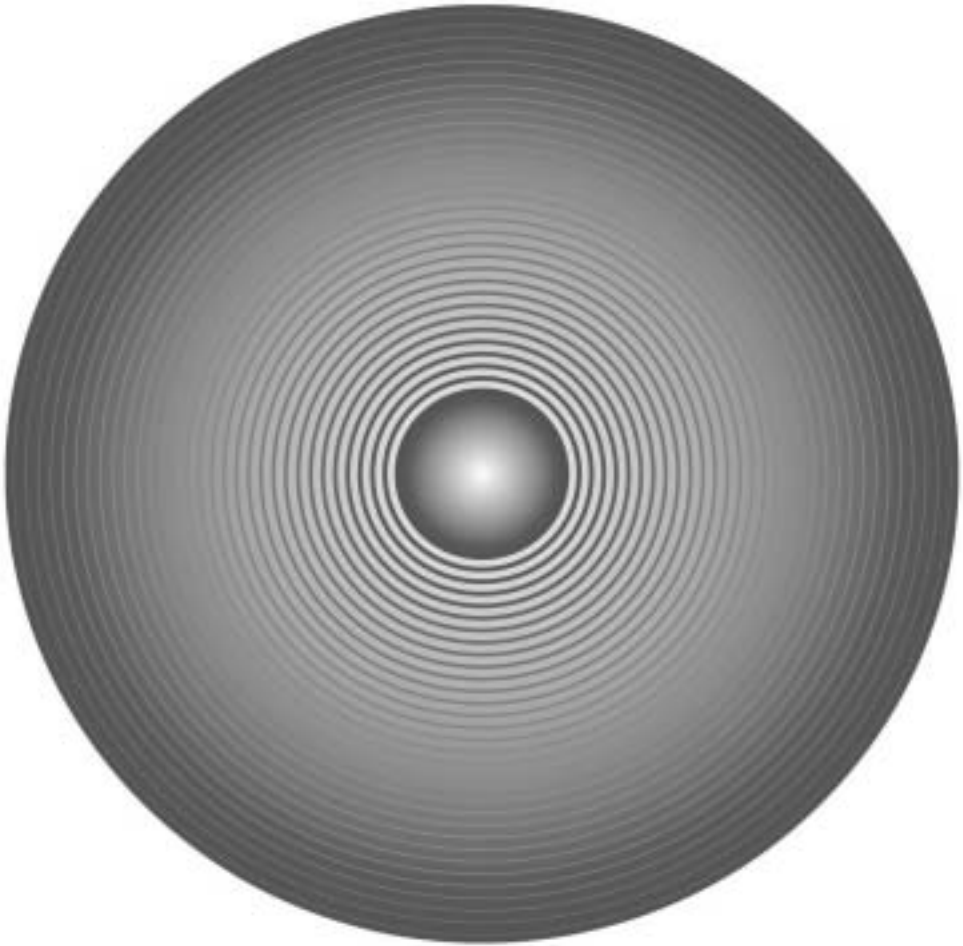

Ninoslav Šafarić

These are psychotronic mind control demonstrations from the book «Psihotronika» published in Croatian language.

Demonstrations have only temporary effect and they are harmless (hope you will find them interesting),but, psyhotronic mind control is still unreserched field, so, I must warn you that **you are reading from the next page on your on responsability.**

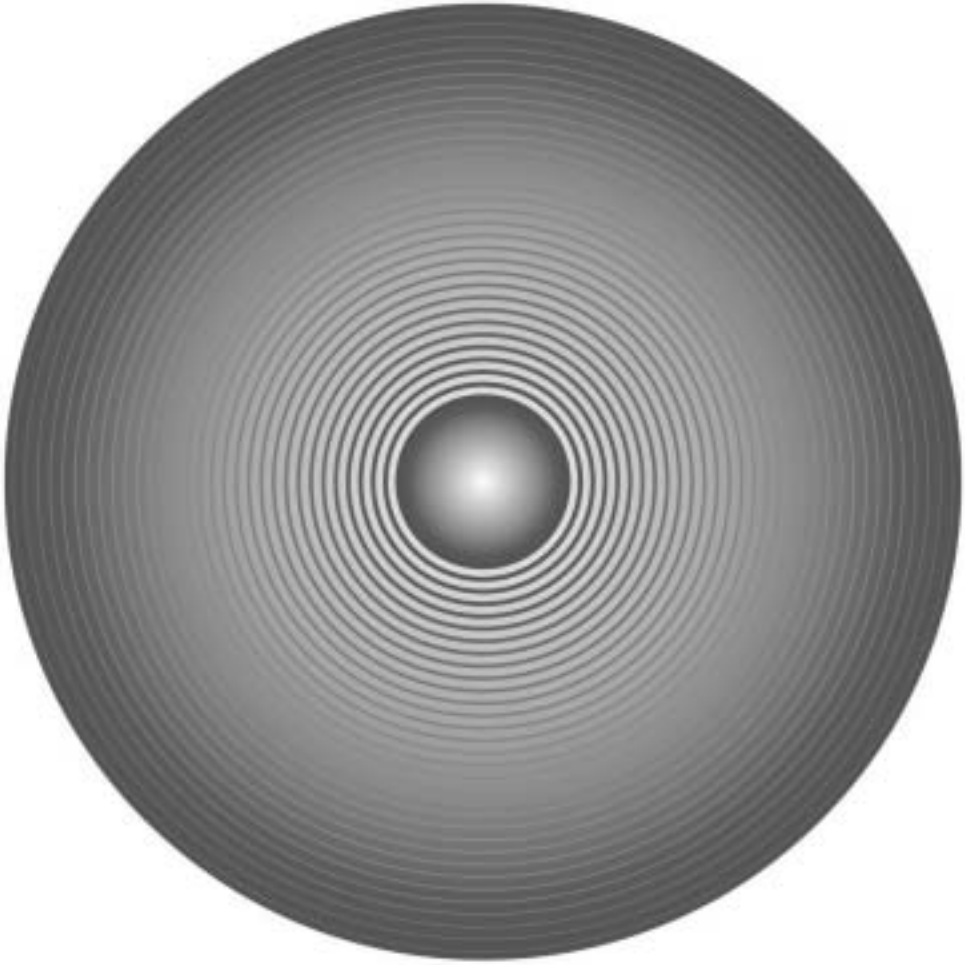

If you are not brave enoght, read explanation at the end of this article.

Look at the center of this graphic for few minutes and try to feel your physical and mental condition.

What I wanted you to feel?

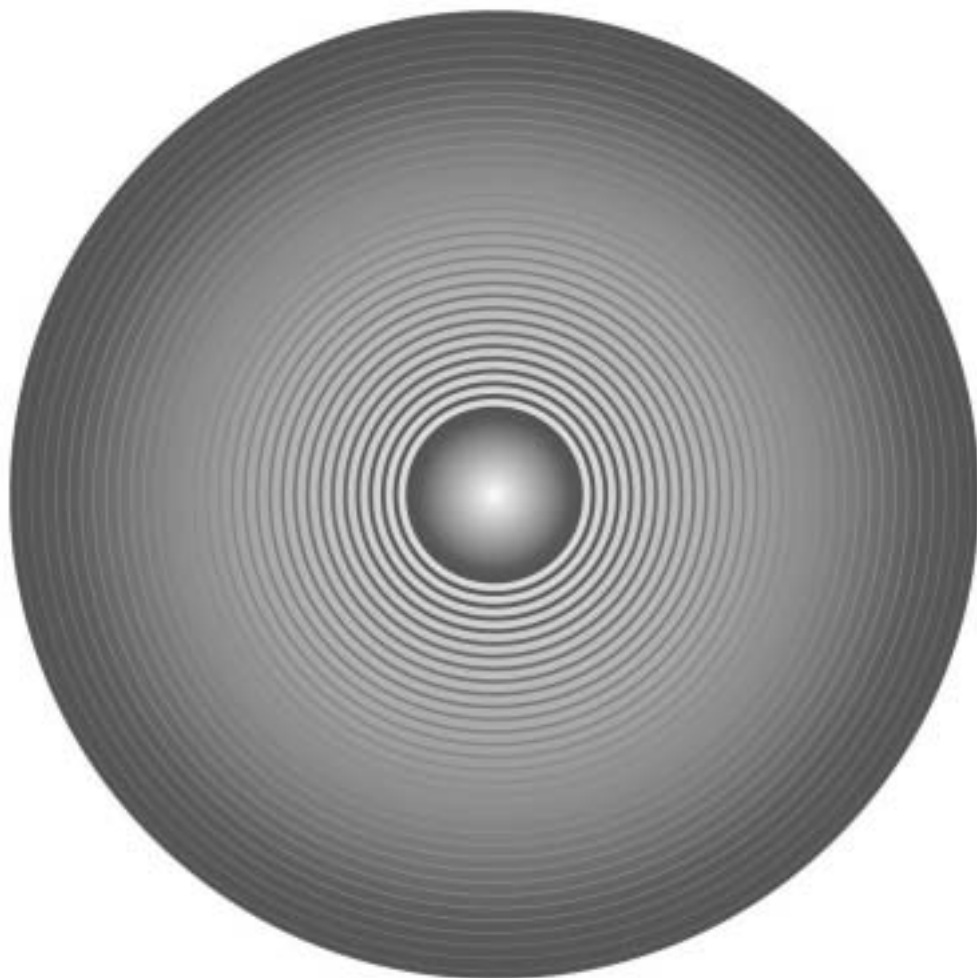

Beneficial influence, rise of physical and mental energy, euphoria, positive emotions.

Look at the center of this graphic for few minutes and try to feel your physical and mental condition.

What I wanted you to feel?

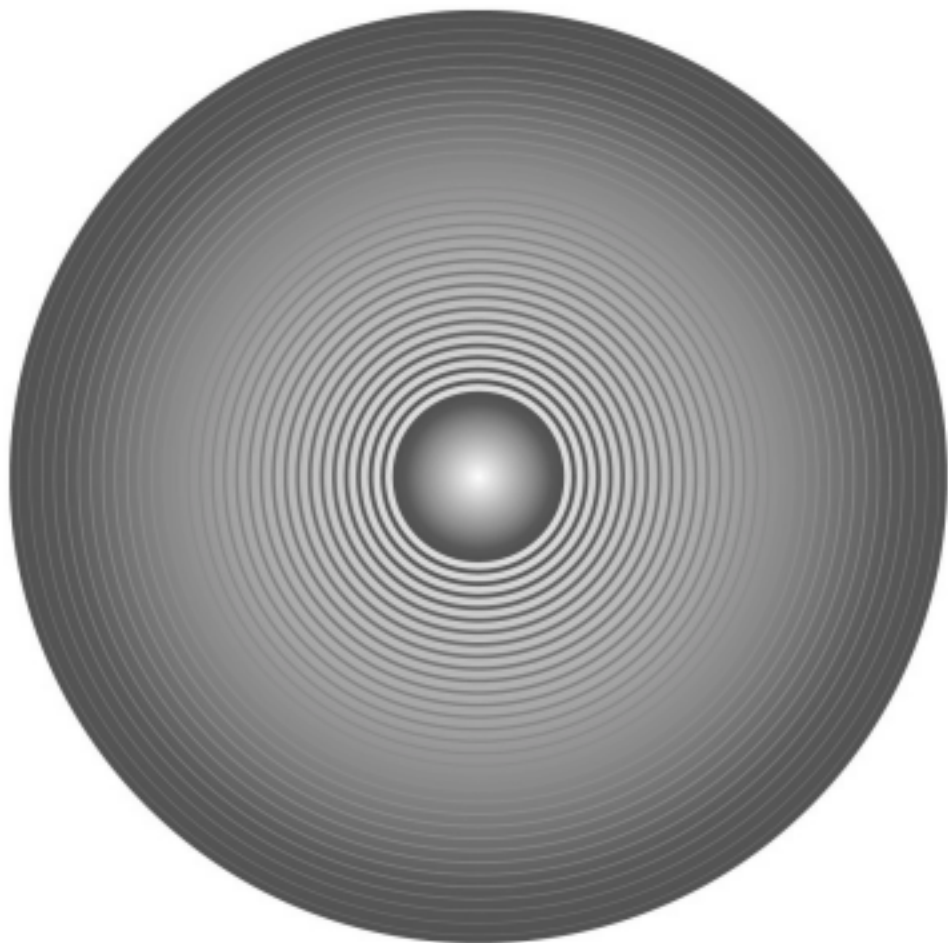

Physical and mental energy are decreasing, bad emotions and weakness.

Look at the center of this graphic for few minutes and try to feel your physical and mental condition.

What I wanted you to feel?

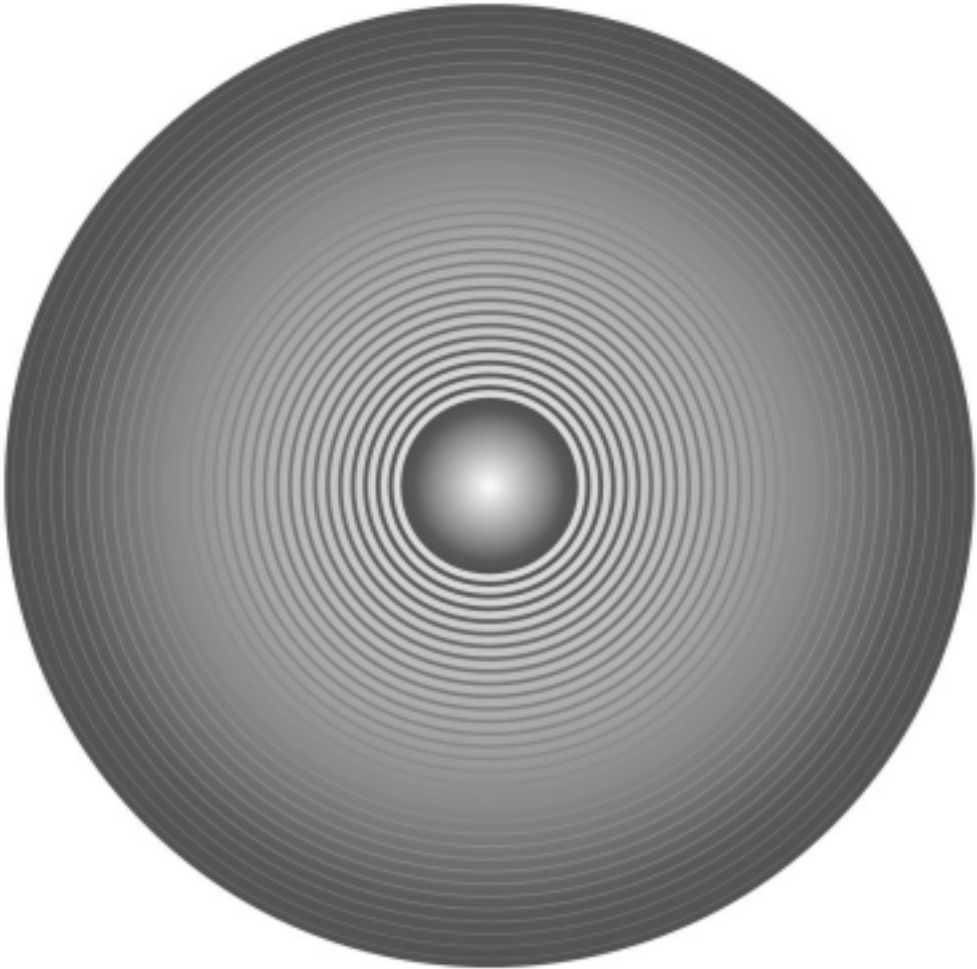

After last one, this influence will again increase your physical and mental energy. After few minutes, it will be very high.

Look at the center of this graphic for few minutes and try to feel your physical and mental condition.

What I wanted you to feel?

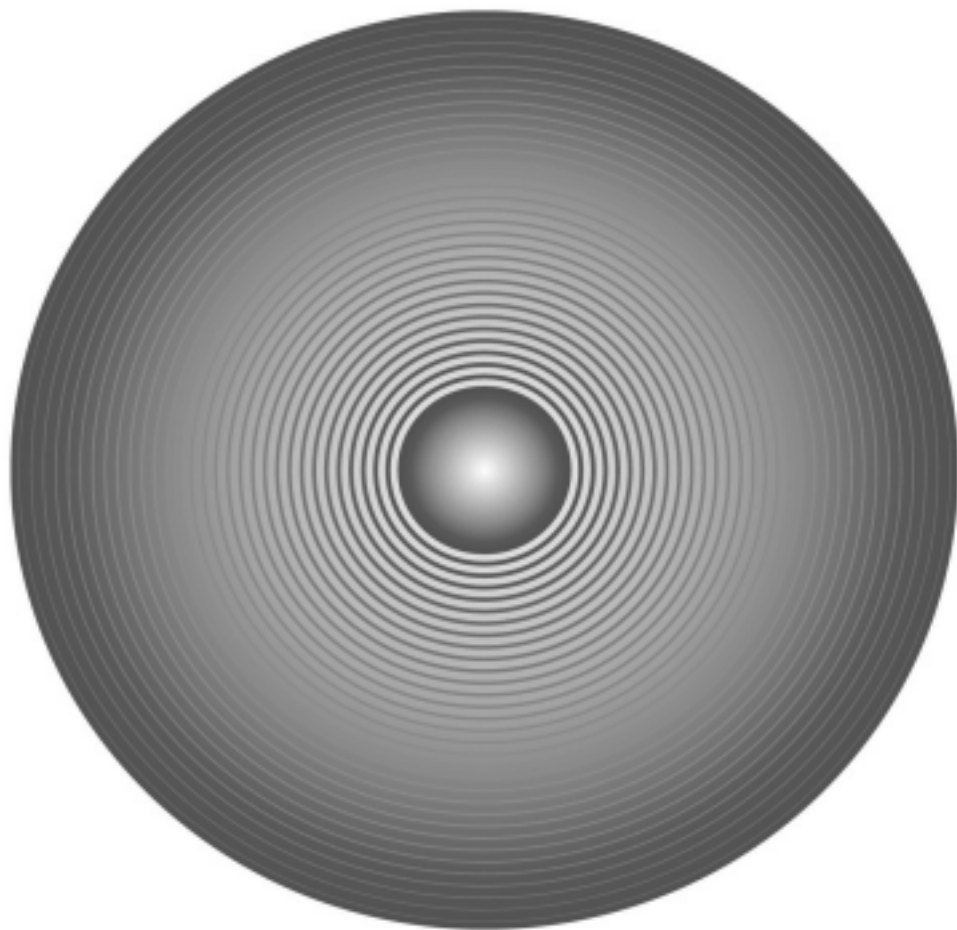

Down again... this influence will make you tired and sleepy.

Look at the center of this graphic for few minutes and try to feel your physical and mental condition.

What I wanted you to feel?

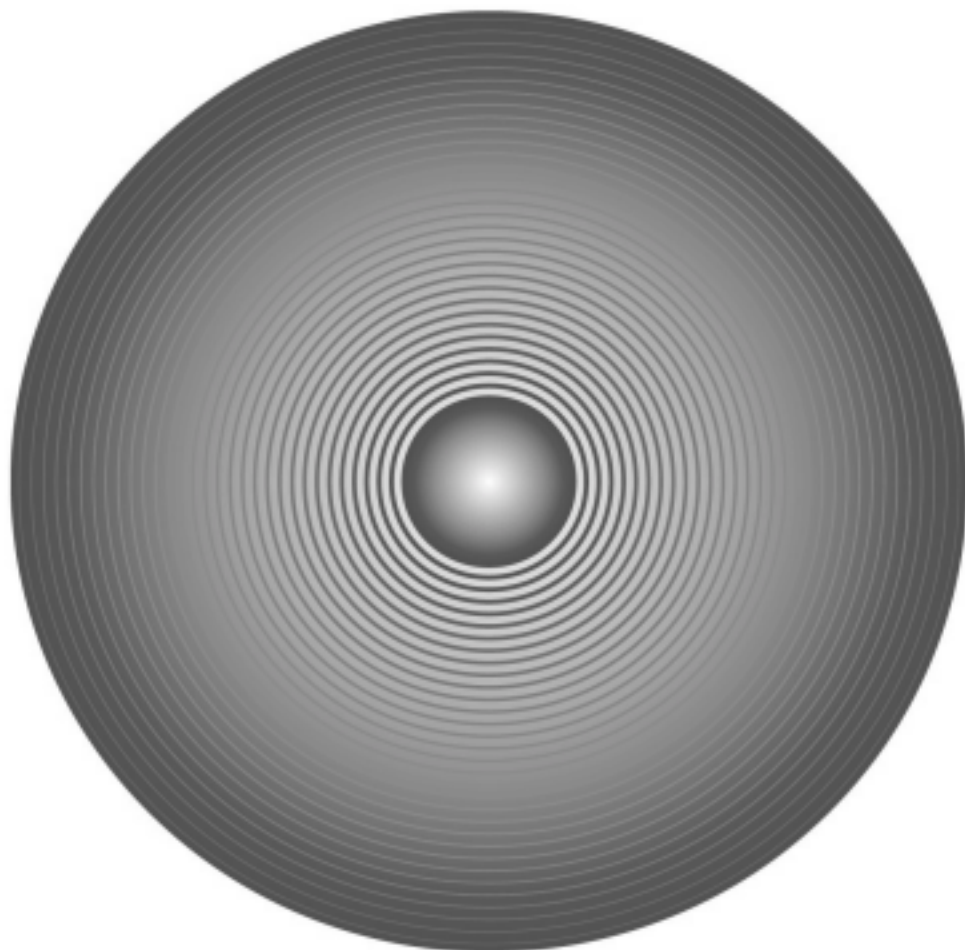

Urge to close your eyes.

Look at the center of this graphic for few minutes and try to feel your physical and mental condition.

What I wanted you to feel?

Urge to bow, bend the head down.

After all these subliminal psychotronic influences, this will put you back in normal condition.

Psychotronic mind control is reality and possibility of trained human mind. Our minds are naturally connected. Intentional influence is not bound by time, space or media. When you were looking at graphics in this article, your brain was influenced by gamma frequencies carrying subliminal suggestions. This is the same principle as communication between electronic transmitters and devices (TV, radio, wireless internet etc.), the only difference, your brain is not capable to read gamma frequencies transmitted by electronic devices, but it is perfectly capable to read and comply to another human mind and subliminal suggestions he is sending.

Psychotronic mind control ability is great (greatest) power and responsibility. I made those influences temporary and harmless, with aim to reveal the truth about natural human mind abilities. Hope you enjoyed it.

Author of this article at the age of twelve, when he began to use intentional psychotronic influences and during writing of the book “Umjetnost psihotronike”. From the first photo you can feel gamma frequencies transmitted from human brain, on second, beta frequencies during concentration on the text.
